Technical Skills

Programming Languages: HTML, CSS, JavaScript, Java, Python, C, GoLang, Android
Frameworks: Spring Boot, Django, NodeJS, ReactJS, VueJS, JQuery
Databases: Oracle, MySQL, NoSQL, PostgreSQL, MongoDB, Firebase
Testing: JUnit, Mockito, Postman
DevOps: AWS Cloud, AWS EC2, Docker, Github Actions, Runners
Tools & Technologies: Linux, Figma, RabbitMQ, Kafka, IntelliJ IDEA, VS Code, Jira, Shell Scripting
Visualization Tools: PowerBI, Tableau, Streamlit
Other: Word, PowerPoint, Excel, SSH, REST API, JSON, Object Oriented Programming, Agile

Education

Master of Applied Computing <i>University of Windsor</i>	Sep 2023 - Dec 2024 GPA: 84/100
Bachelors of Computer Engineering <i>Kadi Sarva Vishwavidyalaya</i>	Jun 2018 - Mar 2022 GPA: 91/100

Experience

Software Engineer <i>MindArray Systems Private Limited</i>	Jan 2022 - Jun 2023 Ahmedabad, IN
- Participated in Scrum meetings with a 15-member team, using GitHub for Agile collaboration to ensure optimal uptime and cost efficiency for the Network Monitoring Tool (Motadata) - Engineered a feature-rich back-end and front-end using Java and JavaScript frameworks, developing 15+ reusable components, aligning with strategic goals for innovation and faster user response times - Expanded device monitoring capabilities by developing plugins in Java, Go, and Python, increasing network management efficiency by 15% - Implemented rigorous unit testing, achieving over 80% code coverage and resolving 25+ bugs during sprints to enhance code reliability - Improved system performance by integrating Redis caching, reducing SQL transactions and load times by 40%, and ensured collaboration across 12 microservices using RabbitMQ - Optimized task execution time through advanced multi-threading, significantly improving overall application performance and response speed	

Projects

Greencart 🔄 – <i>Python, Django, Github, HTML, CSS, JavaScript, Tailwind, SQLite</i>	July 2024
- Developed a responsive e-commerce website for plants using Django for the backend, and HTML, CSS, and Tailwind CSS for the frontend, ensuring an optimized user experience across devices - Established a ticketing system that allows users to submit queries and track their resolution status, with an admin interface for managing and updating tickets	
RentRipple 🔄 – <i>ReactJS, NodeJS, ExpressJS, MongoDB, Redis, Docker, JWT tokens, AWS</i>	Jun 2024
- Developed a responsive e-commerce platform for plants using Django (backend) and HTML, CSS, and Tailwind CSS (frontend), ensuring seamless functionality across devices - Optimized user experience and system efficiency by leveraging Django's robust backend framework and Tailwind CSS for responsive design - Enhanced deployment using Docker, Amazon EC2, and GitHub Actions, improving CI/CD workflows	
Job Radar 🔄 – <i>JavaScript, Java, Github, ReactJS, Figma, Maven, Spring Boot, Jsoup, Selenium</i>	Dec 2023
- Developed a search engine for co-op job postings by crawling and scraping LinkedIn, Indeed, and Workopolis, utilizing advanced scraping techniques with Jsoup and Selenium to ensure up-to-date job data - Crafted a responsive UI leveraging Bootstrap and ReactJS, implementing two RESTful APIs using Spring Boot to facilitate real-time data access, ensuring seamless integration and improved user experience	

File Fuse – C, Linux, System Programming, Bash Scripting

Mar 2024

- Built a custom C shell from scratch, handling user commands, special characters, and functionalities like piping, redirection, conditional execution, designed specifically for the Linux environment
- Utilized concepts of Operating Systems, Network Protocols, and System Programming

NourishNet – Python, MySQL, Docker, Streamlit.io, Jupyter Notebook, Gemini AI

Apr 2024

- Leveraged machine learning and AI for comprehensive data pre-processing and cleansing, utilizing techniques such as data normalization and transformation to ensure high-quality, accurate data for analysis
- Implemented structured storage solutions for large datasets in MySQL, optimizing database performance and utilizing Streamlit and Plotly for interactive data visualizations, enhancing data accessibility and insights
- Integrated Gemini AI to provide valuable insights into filtered data, enhancing decision-making capabilities

Co-Curricular Activities

NourishNet – *Selected NourishNet for CS demo-day presentations among 50 projects*

- Demonstrated strong problem-solving and presentation skills

EMC (Event Management Committee) Member at MindArray Systems

- Planned and executed events, demonstrating strong organizational and coordination skills, and enhancing company culture

SSIP (Student Start-up and Innovation Policy)

- Demonstrated entrepreneurial spirit and passion for innovation through involvement in start-up initiatives

Sarva Netrutva Leadership Program, KSV

- Developed leadership skills and strategic thinking through active participation

Certificates

Unix Essential Training, LinkedIn Learning

Jan 2024

Git Essential Training, LinkedIn Learning

Dec 2023

Learning Docker, LinkedIn Learning

Nov 2023

Learning Java 11, LinkedIn Learning

Nov 2023

Using Python to Interact with the Operating System, Google

Apr 2022

Introduction to Data Science, IBM

Jan 2022
